
SPEC OIL HEAT TRANSFER

HEAT TRANSFER 68

General Purpose Heat Transfer Oil

Description

HEAT TRANSFER 68 is a paraffinic mineral oil used in enclosed circulating systems for the transfer of heat. HEAT TRANSFER 68 has good oxidation and thermal stability without the use of antioxidants.

Outstanding Features

HEAT TRANSFER 68 has the following features:

- Non-additive mineral oil
- Good oxidation and thermal stability
- Non-corrosive
- Non-toxic oil
- Easily disposed

Directions for Use

HEAT TRANSFER is recommended for use in all heat transfer operations where additives are not required. It can be used in industrial applications, textile producers, chemical plants

Technical Data

Appearance	Pale yellow fluid
Viscosity @ 40°C	68 cSt
Viscosity @ 100°C	8,5
Pour Point °C	-30
Flash Point °C	220

Pack Sizes

1000 Liter Bulk
210 Liter Drum
20 Liter Pail
5lt Bottle
